# PASSION

forward

Advancing Contemporary ABA Practices

Welcome to the AzABA 2022 Annual Conference! This year's theme, *Passion Forward: Advancing Contemporary ABA Practices*, was created with a few thoughts in mind. The first being passion; when we look at our membership and community, that was the theme that rang loudest. We believe our community is passionate about the care they provide to their individuals seeking service. Our events throughout the last few years speak to the level of involvement and dedication from the membership as a whole. As for the forward movement, we, as practitioners, should continue to seek best practices for ourselves and those in our care. We believe in the science of ABA and are aware that the history of the field was just the start, however, there is still work to be done and progress to be made in a new direction, a human first direction. We strive to provide our membership presentations to grow into a person centered approach. Our speakers align with these practices and will provide opportunities to learn and grow within this space.

We hope the education, conversations and interactions with your peers over the next couple of days reignite your passion and spark forward movement in your practices!

Thank you to our Legacy Sponsor!
